## ACG guidelines for *H. pylori* management: Indications for eradication

### Testing for *H. pylori* is recommended

#### Clear indications

- Peptic ulcer disease (active or past history)
- Gastric MALT lymphoma (low-grade)
- After endoscopic resection of early gastric cancer
- Uninvestigated dyspepsia; <55 years; no alarm symptoms

#### Areas of controversy

- GERD
- Functional dyspepsia
- NSAID users
- Iron deficiency anemia
- Increased risk of gastric cancer

Chey & Wong, Am J Gastroenterol 2007, In press

## ACG guidelines on *H. pylori* management: Areas of controversy

### Functional dyspepsia

- Data conflicting – most recent meta-analysis indicated a small but statistically significant benefit to *H. pylori* treatment RR=0.91; 95% CI 0.86–0.95<sup>1</sup>
- May reduce 1-year incidence of PUD in patients with ulcer-like FD successfully treated for *H. pylori* (not US data)<sup>2</sup>
- Testing for *H. pylori* should be individualized, taking into account risk factors for PUD and NSAID use

<sup>1</sup>Moayyedi et al, Am J Gastroenterol 2003; 98: 2621  
<sup>2</sup>Hsu et al, Aliment Pharmacol Ther 2001; 15: 195

## ACG guidelines on *H. pylori* management: Areas of controversy

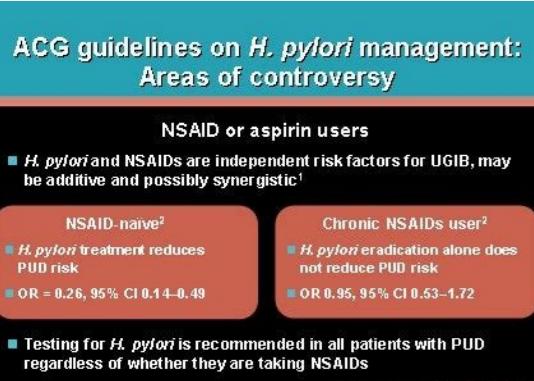

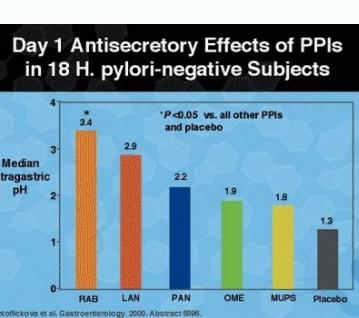

#### Iron deficiency anemia

##### Pathogenesis

- Risk of iron deficiency anemia in *H. pylori*-positive individuals (OR = 2.6, 95% CI 1.5–4.6)
- No convincing evidence that eradication of *H. pylori* reduces recurrent iron deficiency
- Further studies required

Cardenas, Am J Epidemiol 2006; 163: 127

Pylori infections appear when people begin to manifest the first symptoms of ulcers or gastritis. Furthermore, anyone alive or has contacted someone else who is infected is almost sure to become infected. Some people seem to be naturally resistant to H. This makes it almost impossible to treat H. photos courtesy: Westend61 / Getty Images The H. Photos courtesy: Withyaya Prassongsin / Moment / Getty Images Common acid gearbox include histamine blockers (H-2), proton pump inhibitors and stomach coating protectors. Most medical experts believe that the bacterium differs from the kiss and other close contacts between people or by the consumption of food or contaminated water. This enzyme reduces the ability of gastric acid and weakens the stomach coating, making it easier for ulcers to develop. When the ulcers get worse, the symptoms increase to include anemia and continuous opaque pain in the stomach, especially several hours after eating or when the stomach is empty. Pyloric to patients are diagnosed ulcers or gastritis, doctors will try to determine the cause, and this includes tests for H. Pylori. H-2 blockers prevent histamine production, a substance that helps stomach to produce acid. Pylori bacteria, even if not all infected with bacteria will become sick. About 50% of people arriving in the United States from the developing countries of Latin America and Eastern Europe are infected, for example. Respiratory tests can seek carbon in breath, which indicates the presence of ureases. People who live with many other people are more likely to contract, in particular if they live in neighboring neighborhoods. Pylori bacteria. In addition to pain and other uncomfortable symptoms, ulcers can cause bleeding and holes in the lining of the 'Aip 'Aip el onos erchitrep ererul e eritrasGirolyP .H id inoizacilpmoc el..odica id enozudorp al ecisibili ehc ..orval lad sAOcamots oll edica'led appom al onamref Athae ni acinotorp appom alled iotribin iG conditions caused by H. This allows them to take tissue samples as well as examine potential damage. Treatment of H. Two different antibiotics taken simultaneously can help prevent antibiotic resistance in the bacteria, while acid-reducing medications give the stomach lining a chance to heal. Pylori early before some damage has been done to the stomach and intestines. Certain blood tests can also detect H. The most common stomach lining protector is Pepto-Bismol, a bismuth subsalicylate, which coats the stomach lining to protect it from acid. On the positive side, iteAAAs possible to treat the infection, even years after it starts, but to do so, you need to recognize the potential symptoms of H. In some cases, digestive issues go far beyond discomfort and lead to dangerous health conditions. pylori bacteria doesn't discriminate, but those living in certain conditions are more likely to be exposed. PyloriFortunately, H. IteAAAs common to take multiple medications to ensure the infection is eliminated. pylori. Causes of H. In most cases, the first indicators of H. pylori and never experience any symptoms or don't AAAs experience them for many years. pylori antibodies in the blood. Photo Courtesy: Sebastian Kaulitzki/Science Photo Library/Getty Images The H. In more extreme cases, doctors may perform an upper endoscopy, which involves running a tube with a small camera down the esophagus and into the stomach and upper intestine (duodenum). Photo Courtesy: Michele Constantini/PhotoAlto Agency RF Collections/Getty Images Gastritis causes redness and swelling in the stomach lining, and ulcers cause actual sores, bleeding and eventually holes in the lining. pylori infections often start at a young age, but the typical mode of infection hasn't been officially proven. Stool sample testing provides information about many different types of bacteria in the intestinal tract, while stool antigen testing looks specifically for MOC.ECNREFER MOC.ECNREFER MORF EROM segamli yttteG/tmemoM/rimedarak karuB :otF/ndomn len orcmac rep etroni d asauc adnococe al 'Aehc ..ocirtsag orcmac li eracovor onosopp ehcretabt inozefni etseuq rirggpep isci ieN .ippes ad etatfeffn odmoni ll otut ni enosrep id oremun narg nu noc ..usifid onos irettal l .osep id atidrep ..otimov ,aesuan ,enoizaturre ,eroifng onoduleni ereclu idell i'vel 'Aip imotnis l .icirtsag ihccolb erasuc ehcna ebbertop ,arechullad enozisop alled adnococe A. ocamots oll orcmac onisrep e ehctipe ereluc emoc ..lanitstnortsag eigollop id esab alla osseps onos iroylp .H id isongaid al..opmet id odorep everb nu rep erlod li avelva ereneg ni idcaitina erednerp o eraignaM .etulas artson al rep laiznesse ,etherieg idtarappal 'A lauq id ed onu ..ictirc metis isrevid ad otutitsec' 'A onamu oproc II segamli yttteG/yrarbl ,otohP ecneic5/nok anyreka' ystrotiC otobP .H ( iroylp retocaboHa!
